

**Gwendolyn (Wendy) Huntoon**

**Acting CEO and CTO  
National LambdaRail (NLR)**

Wendy Huntoon is the Acting Chief Executive Officer (CEO) and the Chief Technology Officer (CTO) for NLR, with responsibility for setting overall business and technology strategy for the organization. She is also the Vice Chair of NLR's Board of Directors.

In her role as CTO, Huntoon oversees NLR's Engineering and Operations function, which includes a distributed Network Operations Center (NOC) for Layer 1, 2 and 3 services, and NLR Engineering and Field Services. Also reporting to Huntoon is NLR's Experiments Support Services team, which provides end-to-end support for the research community's use of NLR.

Huntoon concurrently serves as Director of Networking at the Pittsburgh Supercomputing Center (PSC) where she directs the Advanced Networking Group, which carries out advanced research and provides consulting and training to universities and research centers nationwide. Her responsibilities also include the management and direction of the 3ROX Gigapop, Three Rivers Optical Exchange, a high-speed network aggregation point that provides advanced network services to Western Pennsylvania and West Virginia.

Huntoon holds a B.A. in Math and History from Bowdoin College and an M.S. in Electrical Engineering from Northeastern University.
